

Egg Carton Jellyfish

- Cut out individual egg carton cups. Paint them in the colors of your choice. Immediately add glitter, then let them dry completely.
- Using a pair of scissors, poke a hole in the center of the egg carton cup.
- Cut a piece of thin ribbon (about 5" in length). Loop it and tie the two ends together into a knot. Then pull the top of the loop through the hole to create a hanger for your jellyfish.
- Glue googly eyes to the front of the egg cup.
- Cut ribbons in a variety of sizes and styles (about 12" long). If using, cut bead necklaces to roughly the same length. Bind the ends of 6-10 ribbons and/or bead strings together.
- Hot glue the ribbon bundle inside the egg cup. (*Adult supervision required for this step.*)
- Place your finished jellyfish around the house, create a jellyfish garland, or turn them into a mobile to hang above your bed!

Did you create your own egg carton jellyfish?
