

Super Simple Fish

Start by folding a square piece of paper diagonally (both sides) and in half (one side) – crease and unfold as shown on the first image to the right. Hold the paper as indicated with blue spots and fold towards the center to get a triangle shape. Now hold the right bottom corner of the triangle and fold it toward the center along the crease

shown on the image to the lower right. Do the same with the other corner – we got fish tail!
